

SolidWorks Enters The Fold

Seifert Technologies, Inc. has added SolidWorks to its arsenal of CAD programs. This addition came about due to customer demand and the latest industry trends. Seifert Technologies has always taken pride in keeping up with the latest CAD technologies. SolidWorks will compliment our other existing systems, Pro/ENGINEER, Unigraphics, Autocad, Cadam and Microstation, very well.

SolidWorks boasts that it is the most powerful, easy to use, and innovative Software in mainstream CAD. It allows you to evaluate more design alternatives, reduce errors, and enhance product quality. Only SolidWorks 2001 offers the solid modeling power and performance to get any job done, while being intuitive enough for every engineer and designer to learn.

If you know Microsoft Windows, you're well on your way to designing with SolidWorks 2001. The unique drag-and-drop capabilities of SolidWorks allow you to build assemblies in record time. Manage your CAD files easily using SolidWorks Explorer, the only CAD file manager that is as intuitive as Windows Explorer. With SolidWorks 2001, you can get more work done in less time and bring better quality products to market faster.

SolidWorks also has incorporated one of the first email enabled communication tools designed to dramatically ease the sharing and interpretation of mechanical drawings and models. Their eDrawings™ allow the sharing of CAD data with anyone who owns a windows PC.

The model shown here is a typical example of the power pertaining to SolidWorks

The Seifert Group Website Continues to Grow

With all the changes taking place in technology, where can companies go to obtain the latest and most accurate information? The Massillon, Oh based Seifert Group recently unveiled their new web site featuring the three different companies that comprise The Seifert Group and a mini-newsletter called TechFlash.

The new web site helps better define the separate companies within The Seifert Group. It also identifies each companies core strengths that include

Engineering, Design, IT Services, Design and Build and Technical Employment Services.

“As companies access the information highway, they soon discover they need updated information on their vendors and customers,” explains Tim Seifert, president. “We wanted to make sure that all of our customers are fully aware of everything we offer through our organization”.

The upgraded site also features a newsletter called the TechFlash. “With just a click of the mouse,

TechFlash gives companies the latest and most accurate information regarding updates in the field of technology,” says Seifert.

To surf the site or obtain more information, log on to www.seifert.com or call us at 330-833-2700.

If you are interested in receiving The Seifert Group TechFlash newsletter via email, contact Tim Seifert at seifertt@seifert.com
